DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwartz (US 5426517).

With respect to claims 1 and 2, Schwartz discloses the image playback apparatus (a display monitor), to display the image for the purpose of dynamic range changing and tone conversion characteristic changing on at least a part of the reproduced image, (see col. 13, lines 34-40, the operator selects the part of the image using the cursor, and the selected part of the image gets color modified using the luminance levels, col. 8 section colorfulness transform).

With respect to claim 3, Schwartz further discloses the input data unit, (see figure 3, numerical 36 scanner), an image output device, (see figure 3 numerical 34), an area specifying device, (see figure 3, moue), a tone conversion characteristic varying device, (see col. 8, section colorfulness transform) and image processing device, (see figure 3

numerical 34 and 35 as the image output device and the numerical 30 for the image processing device).

With respect to claim 4 and 5, Schwartz further discloses the output device is display, (see figure 3 numerical 34) and area specifying device comprises a line of sight detection apparatus (see figure 3 mouse and the numerical 30 workstation) as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz in view of Truchet (US 5606345).

With respect to claim 6 Schwartz discloses the invention substantially as disclose and as described above in claim 3. However, he fails to disclose the specifying device comprises a touch panel, as claimed. Truchet teaches a display screen with a touch sensitive screen. It would have been obvious to one ordinary skilled in the art at the time of invention to combine the two references as they are analogous because they are solving similar problem of image displaying. The motivation of doing this is to be able to control the monitor or display with out having an extra interface.
